

Klingstone® The Permanent Bunker Solution!

Excellence in Polyurethane Chemistry

Klingstone® could be the solution many Golf Course Superintendents have been looking for!

After a major downfall of rain, traditional Golf Course Bunkers require Major Maintenance Work to restore the Bunker ready for play. This maintenance work can be a challenge to the Course Superintendent, who needs to get the Golf Course back in tip top condition ready for the next round of golf.

Era Polymers have teamed up with **Klingstone® USA**, to bring the Permanent Bunker Solution to Australia. First used in 1997 for Golf Course Bunkers, **Klingstone®** can eliminate the need to replace fabric liners ever again!

Klingstone® an easy to apply single component polyurethane, that will keep your golf bunkers free from contamination and looking good. Once cured **Klingstone®** permanently binds and stabilises the soil/sand in the bunker; by essentially gluing them together.

Era Polymers manufacture **Klingstone®** under licence in Australia which means local delivery times!

Klingstone® - A Durable & Cost Effective Solution to Bunker Maintenance

Easy to Apply	<ul style="list-style-type: none"> - Simple Equipment required; water pump, garden hose & spray nozzle. - Single Component Low Viscosity Material
Reduces Bunker Contamination	<ul style="list-style-type: none"> - Stops stones migrating up from base - No dirt from sidewalls
Stops Sidewall Erosion	<ul style="list-style-type: none"> - Clean Edges - No collapse of steep sidewalls
Reduces Drainage Contamination	<ul style="list-style-type: none"> - No dirt or silt getting into the drains - No fabric to snag - No pins or staples to replace - No fabric to rebury
Improves Aesthetics	<p>Stops:</p> <ul style="list-style-type: none"> - Stones migrating up from base - Discolouration from sidewall erosion - Silt Plugging drains
Reduces Maintenance	<ul style="list-style-type: none"> - No stones to remove - Use bunker rakes with no snagging - Extends sand life
Maintains Bunker Consistency	<ul style="list-style-type: none"> - Clean Edges - Sand playability remains consistent - Drainage remains consistent

Klingstone® The Permanent Bunker Solution!

Excellence in Polyurethane Chemistry

Remove sand from bunker; cut, shape and smooth bunker as desired. Spread 10mm of fresh sand into the bunker without covering the drains.

Spray apply Klingstone® to fresh sand. **Klingstone®** is a single component polyurethane applied with a simple water pump, garden hose and spray nozzle.

Once the **Klingstone®** is cured apply and spread fresh sand to bunker and it's ready for service.
