## Erapol ETL85A

POLYETHER (PPG) TDI PREPOLYMER

### TECHNICAL DATASHEET

**Erapol ETL85A** is a liquid isocyanate terminated pre-polymer based on PPG polyol. Having a PPG backbone means that this polymer is considerably cheaper than polymers made from PTMEG.

Additionally **ETL85A** can be blended with premium grade compounds to product formulations to intermediate performance/cost.

### Application

Generally used in applications where the outstanding properties of PTMEG based materials are not needed.

### Product Specification

<b>NCO Content (%)</b>	4.20 ± 0.20
<b>Specific Gravity at 25°C</b>	1.07
<b>Viscosity at 80°C (cps)</b>	300 - 700
<b>Colour</b>	Amber

### Mixing and Curing Conditions

This information is of general nature and is supplied without recommendation of guarantee. It does not make claim to be free from patent infringement. Properties shown are typical and do not imply specification tolerances. Era Polymers cannot accept liability for loss or damage through use. Whilst these technical details are based on expert knowledge, practical experience and laboratory testing, successful application depends upon the nature and conditions in which the products are supplied. Users must, by comprehensive testing, evaluate this product in their own application.

## Physical Properties

## Processing Procedure

1. **Erapol ETL85A** should be heated to the recommended processing temperature and thoroughly degassed at -95kpa of vacuum until excessive foaming stops.
2. The curative should be added to **ETL85A**, the MOCA must first be melted at 110 - 120°C prior to mixing and Ethacure 300 processed at room temperature. After adding the curative, mix thoroughly, being careful not to introduce air into the mixture.
3. Pour mixed materials into moulds that have been preheated to 80 - 100°C and pre-coated with release agent.

## Adhesion

Adhesion of Erapol based elastomers to various substrates is at best marginal if a primer is not used. Please consult Era Polymers for specific recommendations to improve adhesion.

## Handling Precautions

**Erapol ETL85A** contains small amounts of free TDI. Therefore the product should be used in well-ventilated areas. Avoid breathing in vapours and protect skin and eyes from contact.

In case of skin contact, immediately remove excess, wash with soap and water. For eye contact, immediately flush with water for at least 15 minutes. Call a physician.

If nose, throat or lungs become irritated from breathing in vapours, remove exposed person to fresh air. Call a physician.
